

WALEED AL HARBI

Executive Business Leader | Enterprise Transformation | Digital Strategy | AI-Enabled Enterprise Platforms

Riyadh, Saudi Arabia | +966 570009449 | w@waleed.in | www.waleed.in

EXECUTIVE PROFILE

Executive leader with over a decade of experience leading business transformation, designing enterprise operating models, and developing technology-enabled businesses across logistics, insurance, financial services, automotive, and artificial intelligence.

Brings a unique combination of executive leadership, commercial strategy, operational excellence, business architecture, and enterprise platform design to help organizations transform complex operations into scalable, digitally governed business environments.

Experienced in building digital ventures from concept through commercialization by defining business models, redesigning operating frameworks, leading enterprise platform strategy, establishing strategic partnerships, integrating regulated services, and enabling sustainable business growth.

Recognized for bridging executive strategy with practical execution through enterprise operating platforms, intelligent automation, operational governance, and AI-enabled business capabilities that improve organizational performance and executive decision-making.

EXECUTIVE IMPACT

- Led enterprise transformation initiatives across operations, technology, and business strategy.
- Designed enterprise operating platforms supporting logistics, insurance, transportation, financial operations, and AI-enabled business execution.
- Built commercially scalable digital businesses by aligning business models, operating frameworks, enterprise technology, and strategic partnerships.
- Established business and technology strategies supporting long-term organizational growth and operational excellence.
- Designed integrated operating environments connecting operational execution, financial controls, governance, compliance, and executive reporting.
- Applied artificial intelligence to enterprise operations through intelligent workflow orchestration, operational analysis, decision support, and governed AI execution.
- Built partnership ecosystems involving government entities, insurers, financial institutions, and enterprise technology providers.

Commercial Strategy: Business Development • Go-To-Market Strategy • Strategic Partnerships • Revenue Models • Market Expansion • Commercial Negotiation • B2B & B2G Engagement

Business Operations: Operational Strategy • KPI Frameworks • Executive Dashboards • Asset Management • Contract Management • Project Operations • Performance Analytics

PROFESSIONAL EXPERIENCE

Chief Executive Officer | CARVO | Riyadh

2026 – Present

Lead the company's overall strategy, operating model, commercial development, and business growth while overseeing the design and execution of enterprise operating platforms supporting logistics and operational services.

KEY CONTRIBUTIONS

- Transitioned from Chief Technology Officer to Chief Executive Officer to lead both business and operational strategy.
- Defined the company's operating model, organizational workflows, governance framework, KPI structure, and commercial direction.
- Led the architecture of an enterprise operating platform supporting operational case management, service execution, resource assignment, project monitoring, and executive reporting.
- Established scalable operational foundations capable of supporting multi-party logistics and field operations.
- Directed business strategy, product strategy, partnerships, technology execution, and market readiness.

Chief Executive Officer | CARZ Ltd. | Riyadh

2022 – 2026

Led the business strategy, partnership ecosystem, and commercial growth supporting the launch and market expansion of a Saudi digital automotive marketplace.

KEY CONTRIBUTIONS

- Built strategic partnership ecosystems involving government entities, insurers, financial technology providers, and automotive organizations.
- Defined the commercial strategy, revenue model, partnership framework, and market expansion roadmap.
- Led commercial negotiations, opportunity qualification, and executive stakeholder engagement.
- Directed marketplace operating model design, verification services, financial integrations, and enterprise workflows.

Chief Executive Officer | Sky Innovation | Riyadh

2019 – 2022

Led the development of enterprise platforms and digital business initiatives across multiple industries.

KEY CONTRIBUTIONS

- Designed digital operating models supporting logistics, insurance, enterprise services, and digital marketplaces.
- Defined platform architecture, operational workflows, integration strategies, and commercialization approaches.
- Led enterprise system design initiatives integrating business operations, financial services, and government platforms.
- Established KPI-driven operating environments supporting executive visibility and operational governance.

Total Loss Manager | MEDGULF Insurance | Riyadh

2017 – 2019

Managed end-to-end Total Loss operations while leading operational improvement initiatives across claims settlement and salvage processes.

KEY CONTRIBUTIONS

- Led an operational recovery initiative that eliminated a backlog exceeding 3,000 total loss cases within one year.
- Established KPI frameworks and executive reporting that improved operational visibility and reduced decision-making delays.
- Reengineered operational workflows to improve throughput, governance, accountability, and case completion.
- Managed cross-functional coordination involving claims, towing, storage, auctions, ownership transfer, and regulatory compliance.

Total Loss Operations Supervisor | Al Rajhi | Riyadh

2012 – 2014

Supervised operational execution of Total Loss processes and collaborated with technology teams to improve operational efficiency.

KEY CONTRIBUTIONS

- Participated in redesigning operational workflows through enterprise system automation.
- Defined business requirements supporting workflow digitization and operational integration.
- Improved execution speed and operational visibility through process redesign.

SELECTED ENTERPRISE PLATFORMS

NX-LAM – Logistics Asset & Operations Platform

Architected an enterprise operating platform designed to help logistics organizations manage operational assets, fleets, contracts, leasing, projects, assignments, and executive performance through a unified digital operating environment.

NX-iWork – AI Business Operations Platform

Architected an AI-native enterprise operating platform enabling organizations to deploy specialized AI agents capable of supporting business execution, intelligent coordination, workflow orchestration, decision support, and governed enterprise operations.

IBP – Insurance Brokerage Platform

Designed an integrated operating platform for Saudi insurance brokerage companies supporting brokerage operations, customer management, financial controls, insurer connectivity, regulatory workflows, and ZATCA-compliant financial operations.

Naqlah – Digital Freight Exchange Platform

Designed a digital freight exchange platform connecting licensed logistics providers with businesses requiring transportation services through structured operational workflows, commercial transactions, and intelligent assignment capabilities.
